enteroscopy and capsule delivery devices
ENTEROSCOPY DEVICES

US Endoscopy offers a full line of single-use, enteroscopy devices.

**Roth Net® retriever**

BX00711152
sheath diameter 2.5mm
length 350cm
approximate net size 3x6cm

Designed for removal of excised polyps and foreign bodies within the convolutions of the small bowel.

engineered with a strong, reinforced net for extra security

transparent net material allows for continued examination with easy visibility

**AdvanCE® capsule delivery device**

BX00711144
sheath diameter 2.5mm
length 180cm

Allows for direct endoscopic placement of video capsules* in patients who are unable to swallow or pass the capsule through the pylorus.

facilitates endoscopic delivery of video capsules into the stomach or duodenum

enables small intestinal surveillance in challenging patients with dysphagia, pill phobia, gastroparesis, anatomical abnormalities, and more

*Compatible with video capsules ranging from 10.5mm - 11.5mm in diameter and 23.5mm - 26.5mm in length
US Endoscopy offers a full line of single-use, enteroscopy devices.

The Articulator™ injection needle features a kink resistant, stainless steel sheath to pass smoothly and perform in fully articulated endoscopes.

- **Articulator™ injection needle**
  - BX00711808
    - sheath diameter 2.5mm
    - length 350cm
    - needle projection 5mm
    - needle gauge 25

The Carr-Locke needle is an ideal choice for injection therapy during enteroscopy procedures.

- **Carr-Locke injection needle**
  - BX00711811 / BX00711823
    - sheath diameter 2.5mm
    - length 230cm
    - needle projection 5mm
    - needle gauge 25
  - BX00711812 / BX00711824
    - sheath diameter 2.5mm
    - length 230cm
    - needle projection 5mm
    - needle gauge 23
  - BX00711813 (Pentax 90 series)
    - sheath diameter 2.5mm
    - length 230cm
    - needle projection 5mm
    - needle gauge 25
  - BX00711814
    - sheath diameter 2.5mm
    - length 230cm
    - needle projection 4mm
    - needle gauge 23

  *patented design ensures consistent needle projection every time in most tortuous conditions*

  *luer-lock, spring-loaded handle automatically retracts the needle, reducing the risk of inadvertent needle sticks and scope damage*
**Biopsy forceps**

<table>

</tr>
</tbody>
</table>

The Short Throw™ snare offers superior loop memory and the comfort of one-handed deployment.

*short throw handle offers a 25% stroke travel reduction*

*designed to work in tortuous conditions*
Bipolar hemostasis probes

BX00711841
size 7FR
length 350cm
dual plug

BX00711843
size 7FR
length 350cm
single plug

BX00711847
size 10FR
length 350cm
single plug

The hemostasis probe features a unique, Hydromer tip to help prevent tissue from sticking to the probe.

Jumbo channel cleaning brush

BX00711606
sheath diameter 1.7mm
length 350cm
bristle diameter 7-9mm taper

Designed with a textured, non-slip catheter and soft, specially designed nylon bristles for maximum cleaning effort in scopes that range from 2.8mm and larger.

Valve/control head cleaning brush

BX00711610 / BX00711611
bristle head length 4cm
bristle diameter 10mm

A full head of soft bristles to aid in the removal of gross material, and a grooved, barbell design for a comfortable, non-slip grip.

For more devices available for single balloon and double balloon enteroscopes (230cm length), please visit www.usendoscopy.com.
