

The Endo-Boot™ helps protect your delicate endoscopes against accidental stretching and tearing of the bending rubber suction, as well as chipping or cracking of the distal lens. Facilities that use the Endo-Boot have reported a 50% reduction in bending rubber section replacements¹ — vastly reducing repair costs and downtime of their instruments. Smart, inexpensive insurance — the Endo-Boot is a disposable device that protects your endoscopes during transport and storage.

- **Simple design**
Easy to use
- **Inexpensive**
Smart insurance, cuts costly and timely repairs
