“Clinical study shows that the Infinity® ERCP sampling device yields a diagnostic sensitivity of up to 85%*."

Looking to collect quality samples during ERCP?

The Infinity® ERCP sampling device is purpose built for collecting substantial and quality samples from strictures in the biliary duct.

**The Infinity® device features...**

- Softer bristles to capture abraded material
- Stiffer bristles to help create a defect in the tissue
- Spaces between the bristles to help pack cells into the catheter
- Compatible with long and short guidewires
- Radio-opaque marker to identify brush location under flouroscopy

For more information on the Infinity® ERCP sampling device, contact US Endoscopy today.
